

Payment Options:

The health of your teeth is an investment in your overall wellbeing. Unfortunately, it can be ignored by dental insurance companies. Once you are ready to commit to your smile, we will work with you to find a way. We will make you aware every step of the way. With this in mind, we will sit down with you and go over our best estimate as pertains to your particular treatment.

We have many different financing options. We accept Visa and Mastercard and personal checks. We participate with Care Credit Dental Care Financing. They offer interest free loans up to 12 months or loans with low interest options to extend your payments as long as 60 months. Many of our patients have utilized this option and have been extremely satisfied.

We will also maximize your dental insurance benefits for you. We do not directly participate with any insurance company but we gladly handle all correspondence with them for you. We handle all claim filing and accept the insurance payment. With that in mind, the patient will be responsible for what their insurance does not cover.

We understand our patient's concerns and we continue to work with them to achieve their goals.
